

Colorado's Finest
KENNELS & RANCH

We, at Colorado's Finest Kennels and Ranch have been amazed over the last couple of years at the growing number of families who search out our kennel to replace a pet that has died due to tumors, lymphoma, or organ disease. We have seen how diet, and the lack of appropriate nutrients contribute to multiple disorders and diseases such as hip dysplasia, allergies, arthritis, cataracts, skin and coat problems, strokes and heart disease. We want to do all that we can to ensure long and healthy lives for all of our retrievers and our puppies that go to their new homes. This is why we searched all over for a Nutritional Supplement that we fully believed in. We found this in NuVet Plus Canine.

The scientists, veterinarians, and formulators at NuVet Labs began with the premise that most pet diets are lacking the proper amounts of vitamins, minerals, and antioxidants. There are important nutrients that animals once received when they were living in a more primitive environment that are not available in the modern diet. Commercial pet foods contain many by-products that can make them poisonous, toxic and incapable of reducing the devastating effects of unstable oxygen molecules, also known as "free radicals". Free radicals have been implicated in more than fifty health problems in humans and animals including various forms of cancer, heart disease, arthritis, cataracts, and premature aging.

After extensive testing with many different combinations of ingredients, the scientists at NuVet formulated NuVet Plus. We believe, based on the most current medical, veterinarian and nutritional reports, NuVet Plus will combat the onslaught of free radicals in our companion pets. This unique formula consists of precise amounts of vitamins, minerals, and high-potency antioxidants that when combined, create a synergistic and powerful boost to the immune system. NuVet Plus is a long term nutritional supplement that should be given to the companion pet daily. NuVet Plus presents a frontline defense against the damaging effects of free radicals. Additionally, there are many reports of the remarkable improvements in the skin and coats of the animal using NuVet Plus.

We, at Colorado's Finest Kennel and Ranch, have seen the difference that NuVet Plus makes in our own personal dogs. This is why we give all of our own dogs this supplement and require all of our puppy owners to do the same. It is a condition of our health guarantee since not all dog foods provide all the nutrition that our "best friend" needs.

NuVet Plus is made of all natural ingredients (human grade). It significantly reduces the risk or eliminates many problems that might strike your pet such as

- * Scratching
- * Hot Spots
- * Arthritis
- * Low Energy Levels
- * Digestive Problems
- * Tumors
- * Itching
- * Allergies
- * Premature Aging
- * Cataracts
- * Heart Disease
- * Cancer
